Refund / Deduct require a short note (min 3 chars) so the action is auditable in the student's history.

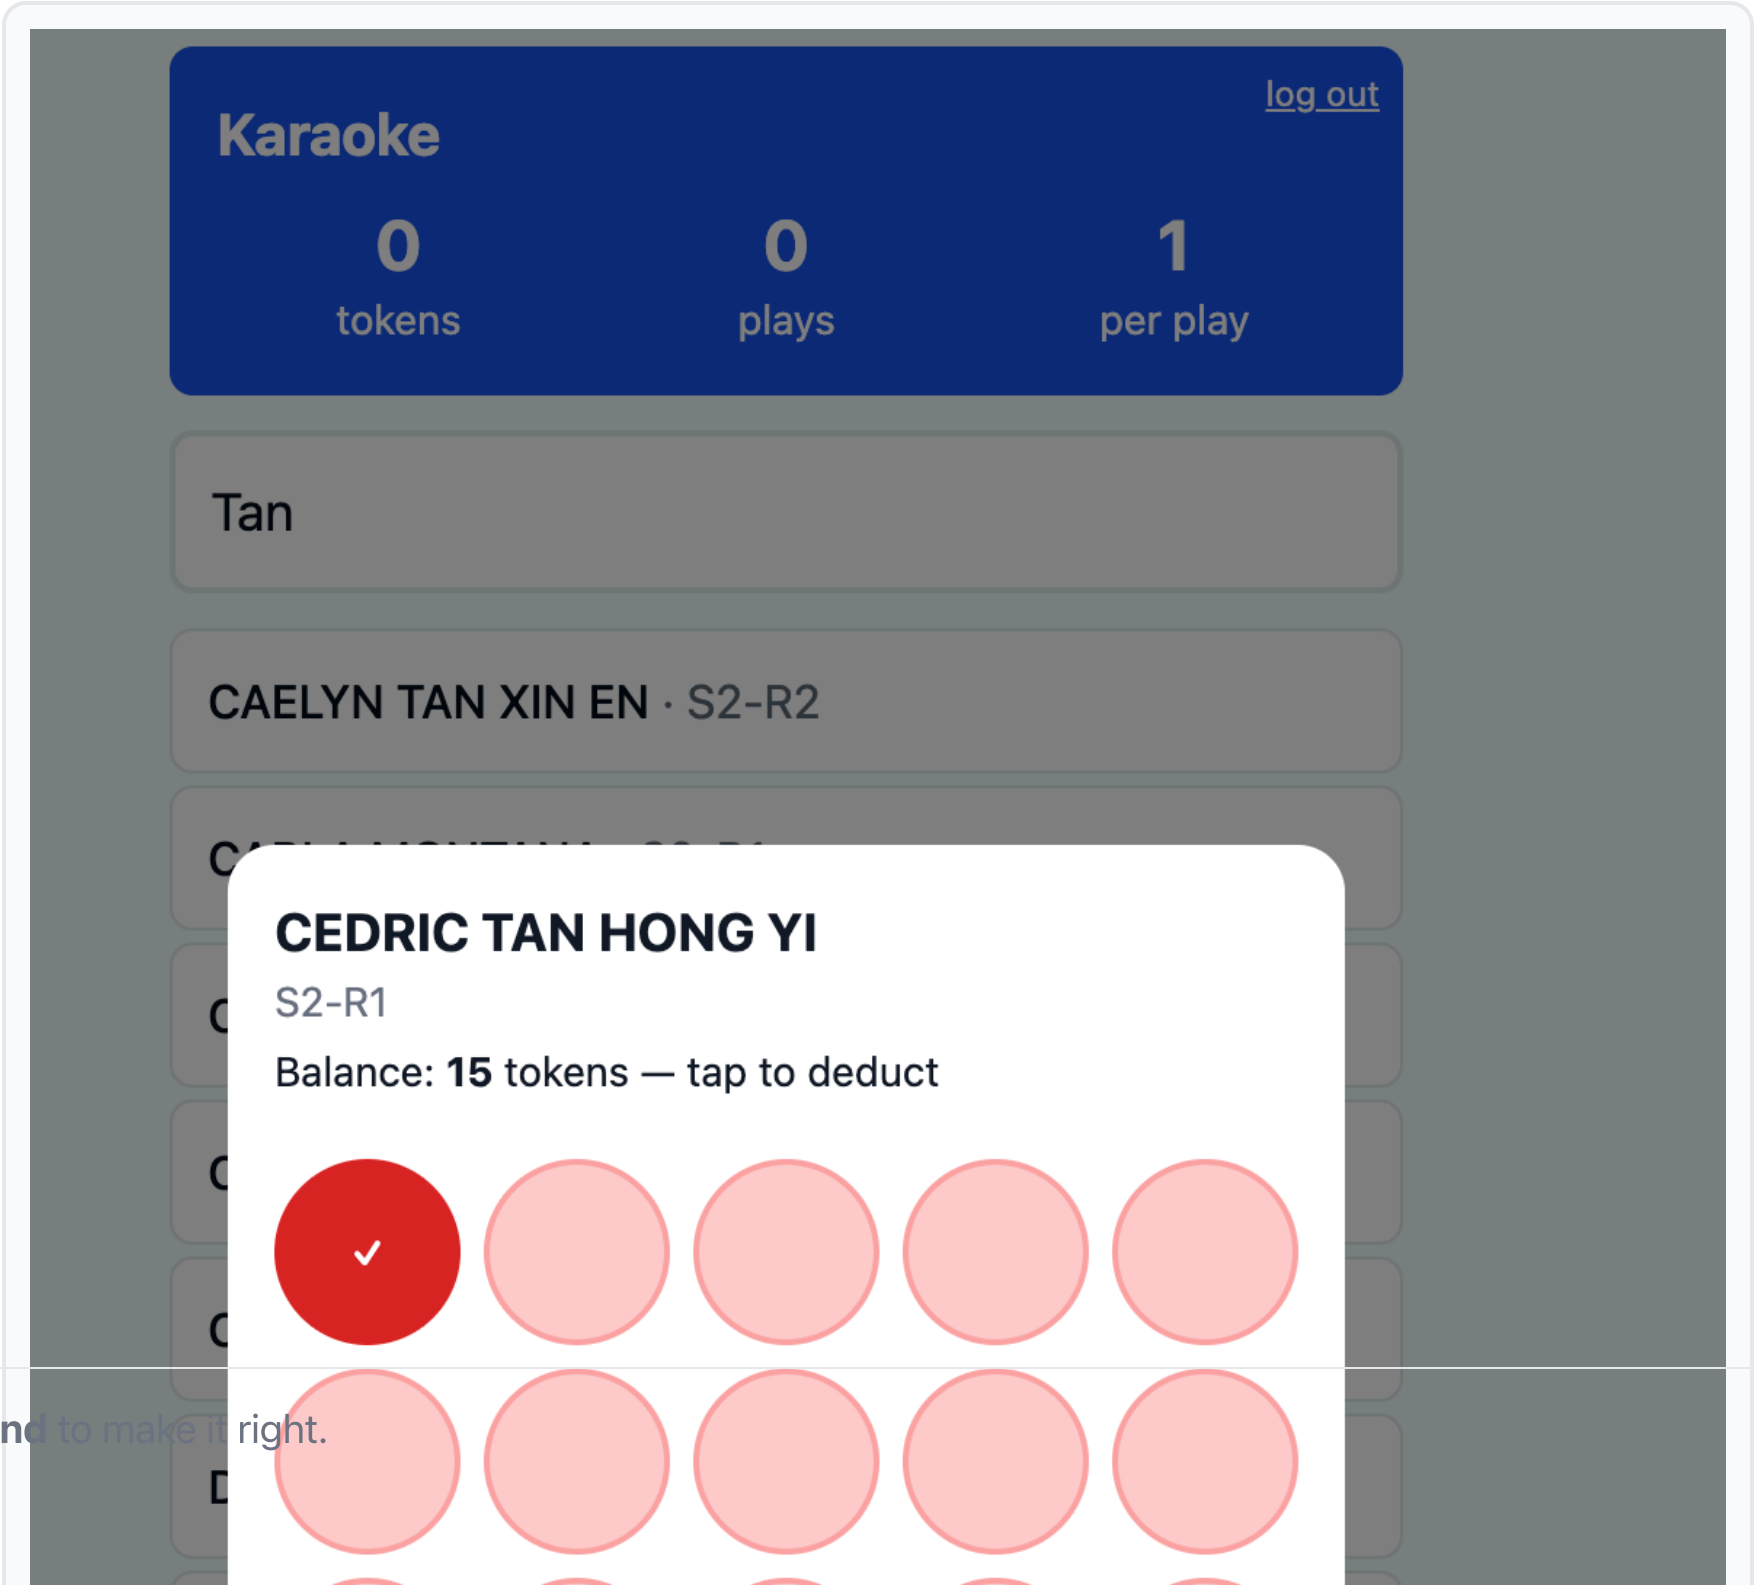

Tell your students: **YOU press PAY**

Booth operators cannot deduct tokens until the student taps PAY themselves. This protects students from being over-charged.

What students should do at a booth

- 1. Walk up to a booth. Tell the operator your **name**.
- 2. Operator searches and taps your name.
- 3. Operator taps red tokens to set the price. **Check the number**.
- 4. **You** tap the green **PAY** button — not the operator.
- 5. If something looks wrong: tell the operator to press **Cancel**, or ask any teacher to refund.

What they'll see

If a student complains they were over-charged, look up their **History** on the teacher screen and use **Refund** to make it right.
